Professional Summary

Results-driven AI/ML and software developer with hands-on experience building scalable web applications and secure AI Multi-Agent orchestration platforms. Delivered end-to-end interview systems using multi-agent orchestration, LLM integration, secure backend APIs, session management, audit logging, and automated candidate evaluation workflows. Skilled in front-end, back-end, and API integration with modern frameworks and tools such as FastAPI, LangChain, Pinecone, AWS, and Laravel to deliver intelligent, high-performance systems aligned with the AI Security Interviewer project.

Technical Skills

Programming Languages: HTML, CSS (Bootstrap), JavaScript, Python, PHP (Laravel)

Libraries & Tools: jQuery, NumPy, Pandas, scikit-learn, Keras, Lang Chain, REST, Fast APIs, Third-Party Package Integration

Database & Developer Tools: MySQL, SQLite, MongoDB, Pinecone, Chrome DB, CI/CD Pipelines

Cloud Applications: Amazon Web Services

Experience

Software Productivity Strategist(NUST)

Artificial Intelligence Engineer INTERN

March 2026 – Present

- Designed and orchestrated a multi-agent AI interviewing platform with distributed prompt generation, answer validation, and scoring agents working in concert to simulate realistic technical screening workflows.
- Implemented agent coordination logic that routes candidate responses through intent classification, security compliance checks, and domain-specific scoring modules for robust evaluation.
- Built a secure backend with modular microservices, centralized audit logging, and policy-driven orchestration to manage candidate sessions, agent handoffs, and result aggregation.
- Delivered an enterprise-grade solution that combines adaptive question generation, real-time feedback, and multi-agent decision making to improve hiring accuracy and operational scalability.

Arch Technologies

Artificial Intelligence INTERN

June 2025 – Aug 2025

- Designed and deployed an AI-driven brain tumor detection pipeline utilizing YOLOv11 and SAM2, enabling high-precision segmentation and classification in medical imaging datasets.
- Constructed a time-series forecasting model for gold price prediction using an LSTM architecture, incorporating advanced feature engineering techniques to enhance predictive reliability.
- Assisted in architecting an intelligent Medical Chat Bot by leveraging Deep Seek LLM, Lang Chain, and Pinecone DB to facilitate context-aware conversational flows and efficient vector-based retrieval.

TNV Solution

SOFTWARE DEVELOPER

Aug 2024 – Feb 2025

- Engineered and optimized RESTful APIs within SuiteCRM to enable seamless synchronization with Google Calendar and multiple third-party platforms, significantly enhancing integration capabilities and data consistency.
- Designed and implemented custom themes while modernizing the admin interface using Bootstrap, JavaScript, and CSS, resulting in a more intuitive and responsive user experience.
- Developed advanced logic hooks and automated background processes to streamline core business operations, minimizing manual intervention and increasing overall system efficiency.

Projects

End-to-End MLOps Visa Prediction Application with CI/CD in AWS

- Engineered an end-to-end ML system that automated the visa approval prediction process, reducing manual workload.
- Applied MLOps best practices to ensure scalability, reproducibility, and maintainability of ML models in production.
- Deployed a containerized Fast API application on AWS, integrated with CI/CD pipelines, enabling continuous delivery of model updates.

Retail Harmony System

Led a three-person team to develop a comprehensive CMS project for a fan manufacturing factory, including a feature-rich e-commerce website using HTML, CSS, JavaScript, and PHP. This project seamlessly integrated cutting-edge web technologies to manage all aspects of the business. The CMS included detailed employee information, order booking, and product and raw material management.

Education

COMSATS University Islamabad (CUI) — Islamabad, Pakistan

Feb 2026 – Present

Master of Science (MS) in Computer Science
